Before COLONOS

After COLONOS

To Whom it may Concern:

For the last four years, we have attempted to bring about a peaceful solution to the peace agreement that was entered into in good faith, with the United Nations, Contra, and the Sandinista regime. In that agreement, The Miskitu commanders (without consulting the Government in exile) gave up our arms with the promise that the UN would handle then police actions that might arise. This agreement was entered into by some Commanders under duress and some of the elders expressing council from the government in exile were ignored. As a result, the Miskitu Nation suffers to the point that their existence is seriously threatened. They have turned to Government in exile for help!

Mosquita is a country of split locations separate from Nicaragua but in Central America bordering Honduras Colombia and Belize. Mosquita has a Democratic Parliament and is striving to establish a Capitalistic economy. We are forced to work underground due to the fact that we are shot at wounded or killed on a daily basis.

The 1948 convention on "the prevention and punishment of the crime of genocide." Since the beginning of this agreement (resolution 650), the Miskitu Nation has not had arms against Nicaraguan citizens. However, the Sandinista FSLN, also known as Colonos, have murdered families, raped women and children, abused the children physically and psychologically and the female children sexually, set fire to homes, plantations, crops, fruit, trees, and forests. They have done all of these things under the direction and protection of Daniel Ortega and Rosario Murillo.

There is a growing influx of people migrating through Central America into Mexico eventually into the US with limited supervision or knowledge of whom or what they might represent. We experience these people before the US sees them. Those same people Ortega send with weapons, they are the ones who come to take over our lands, they burn our homes our crops rape and pillage. Mosquita is a very mineral rich land the ground is ripe for vegetation.

Back in the 1980s Russia and the Chinese made an agreement with Daniel Ortega and Tomas Borges whereby they would remove the Miskitu people from Mosquita Sovereign Territories and the Abundant Natural Resources and share the territories with the two countries in exchange for arms (to the contradiction of two international world courts have told Honduras, Nicaragua, and Colombia that they have no rights to Miskitu Territories).

Daniel Ortega has been paid over Two Billion dollars and given military weapons tanks and air force. The Chinese are mining gold silver and Uranium....These precious metals are being washed in arsenic and other harmful contaminants. These contaminants have killed the river life and nothing grows or lives in the Rio Coco. The Rio Coco merges into the Rio Grande. People in that region are getting sick from drinking the water and babies are born with deformities. The contamination will eventually spill into the Pacific and Atlantic Oceans. May I also mention that the Chinese are scraping the sea of its eggs which leaves the ecology without reproduction. If this continues, gradually we will have a fatal global problem. We have addressed these issues with the UN , US, AND Britain to no avail.

The Chinese are today mining gold silver and Uranium 238 on which goes to the Russians and is refined into weapons-grade U235 and Plutonium. The market is Iran and North Korea. Added to this is the fact that Russia has already built Military Ports (Russian bases at monkey point Miskitu Territory and surrounding Miskitu Islands.) while the Chinese are planning to build a Canal that goes from the Caribbean Seas to the Gulf of Mexico and establish a shipping route into the West Coast ports all controlled by China (Chinese/Nicaraguan Canal).

This would literally annihilate the environment of the last natural forestation left In Central America At least a 3/4 of a million people of Miskitu nation would suffer as a result. later down the line U S will surely have much bigger problems than the "Cuban Crisis" on their hands and the Us will be accessed through the back door via land, air and sea strikes. Don't be fooled by the Russian and Chinese claiming Democracy! Democracy is not beneficial to their leaders. They are not known for their humanitarian ways and people are not banging down their respective door trying to get in but the fact remains that their people are running from them!

God loves the USA and regardless of how we came to power we are redeeming ourselves and the Monroe doctrine still needs to be enforced. We need to spread education development and democracy to all nations especially the ones in our back door that we have been neglecting, but our nemesis is paying close attention to (as more and more of Central and South America Government are becoming communist) and killing off those who would oppose them.

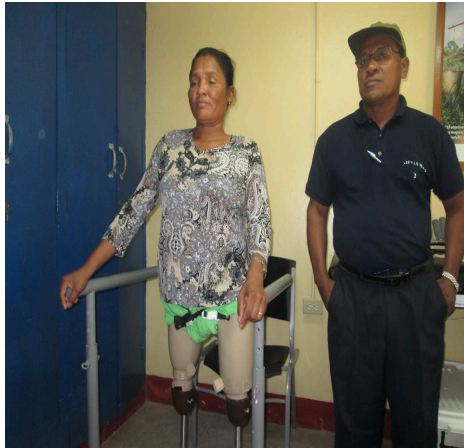

Capitalism is getting out of hand and needs to be monitored yet it leaves room for growth, advancement and success. You can not do that through communism.

Victims of contaminated Water, Gun, indifference, Sexual assaults, water consumption deformities.

Baby on the top right died from dysentery.

Mother and child (center right) both suffer deformities and illness from contaminated water consumption.

Miskitu Children

COLONOS (we personally took these shot posing as a journalist on their side)

Miskitu Nation Homemade self-defense weapons

Aftermath: Miskitu Culture dictates that men stand like men and defend, unfortunately...
